HAIR STYLING ATTACHMENT

ABSTRACT

A hair styling attachment including a main housing and at least a pair of

hair treating members, the hair treating member includes at least a thermally

conductive hair treating surface, the pair of hair treating members being adjacently

disposed with the corresponding hair treating surfaces on the pair of adjacent hair

treating members generally in compressive contact, the corresponding hair

treating surfaces on the pair of adjacent hair treating members being relatively

displaceable to form a gap for receiving the hair to be treated, the main housing

includes an air inlet and the hair treating surface being communicable with the air

inlet.
